"Who it's for" (optional section)

It's for you if:

- You sell a service (freelancer, agency, consultant) and you want cold outreach on autopilot
- You're tired of paying €99/mo to Apollo / Lemlist / Instantly for basic features
- You already use n8n or you're willing to learn it (30 min max)
- You want to **own your prompts and templates**, not be locked inside a SaaS

It's NOT for you if:

- You want a "click-and-forget" tool — this one needs 45 min of setup the first time
 - You send 10,000 emails/day — for that volume grab Smartlead or Instantly
-
